

Rebecca Agbolade

Strategic Data Analyst

Middlesbrough, UK | +447310044319 | agboladerebecca1@gmail.com | LinkedIn | GitHub | Project Portfolio

PROFESSIONAL PROFILE

A Strategic Data Analyst with over 3 years of experience in data analytics, machine learning, and data visualisation. Proficient in Python, R, SQL, and Power BI, I have successfully delivered projects that enhanced decision-making and operational efficiency across public sector and healthcare environments. With a proven track record of building automated analytical pipelines and driving actionable insights, I aim to leverage my expertise to contribute to data-driven decision-making in innovative organisations.

AREAS OF EXPERTISE

- Data Analytics and Visualisation (Power BI | MySQL | NumPy)
- Python | R | Java | SQL
- Statistical Analysis, Modelling and Forecasting
- Machine Learning and Predictive Analysis
- Automated Analytical Pipeline Development
- Natural Language Processing (NLP)
- Stakeholder Communication and Reporting

PROFESSIONAL EXPERIENCE

Strategic Data Analyst (HEO) | UK Government Department | Hybrid / Newcastle

Feb 2026 – Present

- Built and maintained automated analytical pipelines using R and Power BI to support large-scale scheme reporting, reducing manual processing time and improving reporting accuracy.
- Developed and maintained complex DAX measures and data models in Power BI, enabling senior stakeholders to monitor scheme performance and expenditure trends against budget forecasts.
- Conducted analysis of large datasets to identify patterns, anomalies, and trends, providing actionable insights to support strategic decision-making across the organisation.
- Collaborated with cross-functional teams including Finance and Operations to gather assumptions and contextualise data findings for a range of audiences including non-analysts.
- Produced detailed reports and presentations for budget holders and senior leadership, communicating complex analytical findings clearly and concisely.
- Applied sampling and statistical methodologies to support the accuracy and integrity of expenditure reporting.

Information Technology Teacher | Teacher Active | Middlesbrough, UK

Jan 2024 – Feb 2025

- Created and delivered a range of IT courses, including Programming, Database Management, and Web Development, which led to high student re-enrolment rates.
- Implemented interactive and engaging teaching methods that improved student engagement by 30%.
- Spearheaded development of the school's IT curriculum by integrating data analytics and Python programming modules, resulting in 10 new data-driven assignments and a 95% pass rate.
- Customised support for individual learners, resulting in successful completion of 50+ advanced projects.

Data Analyst | Reddington Hospital | Lagos, Nigeria

Feb 2022 – Jan 2024

- Developed a dynamic COVID-19 dashboard using Python and Power BI, creating 20 interactive visualisations used in press briefings and policy discussions.
- Prepared comprehensive reports on COVID-19 metrics for hospital management, streamlining presentation of data from over 500,000 patient records.
- Conducted statistical analysis on healthcare datasets using Seaborn and SciPy, producing insights that resulted in a 25% improvement in patient treatment outcome resolution times.

- Applied machine learning techniques including recommender systems and customer segmentation to optimise budget allocation, contributing to procurement of essential supplies worth £1.2 million.

PROJECTS

- PCOS Health Companion App: Built an interactive R Shiny application for PCOS risk prediction and health tracking, incorporating machine learning models, clustering analysis and data visualisation.
- COVID-19 Hospital Dashboard: Developed interactive Power BI dashboard for hospital management and public communications, drawing on Python data processing across 500,000+ patient records.
- Bank Loan Prediction Model: Led a personal machine learning project using Python and scikit-learn, covering pre-processing, feature engineering, model training, and deployment.
- Bias Mitigation in AI: Investigated diabetes datasets to identify and mitigate algorithmic bias using Python and scikit-learn.
- Digital Bank Customer Analytics: Analysed customer survey data for a start-up digital bank, identifying trends and patterns to enhance engagement and loyalty.

EDUCATION

MSc Applied Data Science | Teesside University | UK

Sep 2023 – May 2024

BSc Actuarial Science and Insurance | University of Lagos | Nigeria

Sep 2017 – Dec 2021

ADDITIONAL SKILLS

Technical Skills

- Programming: Python, R, SQL
- Data Analytics and Visualisation: Power BI, MySQL, Pandas, NumPy, Matplotlib, Seaborn
- Machine Learning: Recommender Systems, Customer Segmentation, Random Forest, XGBoost, Clustering
- Libraries: Pandas, NumPy, Matplotlib, Seaborn, SciPy

Interpersonal Skills

- Report Writing | Critical Thinking | Communication | Research | Collaboration | Stakeholder Management

Training and Certifications

- PL-300 Power BI | Teesside Power BI Women | Community Leader, Women in Data Africa
- Microsoft Azure Fundamentals (AZ-900) | Google Data Analysis (Coursera)
